

Original Night time image. Notice, how most the details are difficult to comprehend.

Seamless image context enhancement via integration of mixed gradient field. Segmentation errors (seen in the importance mask image) do not affect the results significantly. The white balance of Day-image is intentionally left unchanged to create a surrealist effect.

Importance mask used for blending gradients.

When pixels are linearly blend using the mask above, image is not seamless and segmentation artifacts are visible

Day Time Image from the same view
