

TRILL:

Download instructions:

1. Click this link from your iPhone or paste it into your iPhone's browser:

<https://s3.amazonaws.com/trill-app/trill.html>

2. Once it's downloaded, you'll have to "trust" Trill. Go to your Settings -> General -> Profile OR Device Management (third from bottom) -> Trill Inc -> Trust.

Two quick notes:

1. Shhh -- please keep the app confidential for now. (i.e. No press.) But if you have friends who would love Trill, we'd love to have them on the beta. Send us their details.

2. The app is not yet optimized for iPhone 4 or 4S, but works like a charm on 5, 6, and 6+. Ok, you may encounter a bug or two, as it's a beta, and if you do, please let us know and help us make the app better.

- From the developers of Trill (former MIT Sloan students).
